Summary

Software Engineer with 1+ years of experience building secure, scalable REST APIs and web applications using Python, Django, and FastAPI in Agile settings. Skilled in optimizing databases (PostgreSQL, MySQL, Redis) and deploying CI/CD pipelines with Docker and GitHub Actions. Currently developing a virtual credit card backend with Django REST Framework and AWS, aligned with focus on innovative, high-performance digital solutions. Committed to delivering secure, reliable software with a passion for collaboration and excellence.

Skills

- **Languages:** Python, JavaScript, SQL, HTML5, CSS3
- **Frameworks & Tools:** Django, FastAPI, Django REST Framework, Git, Jira, Celery, Metabase, Tailwind CSS
- **Databases:** PostgreSQL, MySQL, Redis
- **Cloud & DevOps:** AWS (EC2, S3, Lambda), Docker, GitHub Actions, Render, Cloudinary
- **Key Skills:** REST API Development, Unit Testing, Agile Methodologies, Database Optimization, Secure Coding
- **Learning:** Generative AI (RAG, NLP), Hugging Face Transformers, Nodejs

Experience

Software Developer – Biddano Pvt. Ltd., Pune

Aug 2024 – Present

- Built scalable REST APIs with Python, FastAPI, and Django, handling 10,000+ daily requests for inventory and order systems, meeting Barclays' need for robust solutions.
- Optimized PostgreSQL/MySQL queries, cutting API response times by 40
- Set up CI/CD pipelines with Docker and GitHub Actions, reducing release cycles by 70
- Achieved 95% test coverage with Pytest, ensuring secure, maintainable code aligned with quality standards.
- Integrated Metabase for real-time analytics, driving data-informed decisions for enterprise applications.

Projects

Credify – Virtual Credit Card Backend

[GitHub](#)

- Developed a Django REST Framework backend with secure APIs for user authentication, KYC, and transaction processing, tailored for scalable digital solutions.
- Used Redis caching and PostgreSQL to optimize API performance, ensuring low-latency user experiences.
- Integrated Celery for asynchronous tasks (e.g., email notifications) and Metabase for transaction analytics, enhancing scalability and insights.
- Configured CI/CD with Bitbucket Pipelines and Docker, with planned AWS deployment (Lambda, S3, RDS) for production-grade scalability.

StockSync – Inventory Management System

[GitHub](#)

- Built a B2B SaaS app with Django REST Framework and PostgreSQL, managing 5,000+ SKUs with real-time inventory tracking.
- Improved order processing by 25% with optimized APIs and JWT authentication, ensuring secure, efficient data handling.
- Reduced page load times by 30% using Redis caching and database indexing, meeting high-traffic performance needs.
- Automated testing with Pytest (90% coverage) and CI/CD with GitHub Actions, ensuring reliable, high-quality code.

Education

B.E., Electronics & Telecommunication

Aug 2019 – Aug 2023

Savitribai Phule Pune University, Pune **CGPA:** 9.02

Relevant Coursework: Software Engineering, Data Structures, Algorithms, Database Systems, Cloud Computing

Certifications

- Django Application Development – IBM (2024)
- Docker, Kubernetes, OpenShift – IBM (2024)
- Python for Data Science, AI & Development – University of Michigan (Coursera)
