

ROHAN RAJKUMAR TEKALE

Backend Python Developer | Pune, Maharashtra, India
tekalerohan2000@gmail.com | +91 9307802374 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Backend Python Developer with **3+ years** of experience designing and delivering production-grade APIs and microservices using **FastAPI, Django REST Framework, and Flask**. Architected solutions delivering up to **40% latency reduction** across high-volume production workloads in pharma, fintech, and hospitality domains. Skilled in **JWT/OAuth2, RBAC, Celery, Docker, AWS (EC2, S3, RDS, ECS Fargate), CI/CD**, and AI-powered backends using **RAG, LLM APIs (OpenAI, Anthropic Claude), FAISS, and ChromaDB**. Maintained **80%+ test coverage** on critical services using Pytest. Seeking a Senior Backend / SDE-II role.

TECHNICAL SKILLS

Languages	Python, SQL, JavaScript, Bash
Backend	FastAPI, Django, Django REST Framework (DRF), Flask, AsyncIO
APIs & Auth	REST APIs, JWT, OAuth2, RBAC, API Versioning, Webhooks, Middleware
Databases	PostgreSQL, MySQL, MongoDB, Redis
Async & Messaging	Celery, RabbitMQ, WebSockets, Background Jobs
DevOps & Cloud	Docker, AWS (EC2, S3, RDS, Lambda, ECS Fargate), GitHub Actions, CI/CD, Nginx, Linux
AI & Search	RAG, OpenAI API, Anthropic Claude API, FAISS, ChromaDB, SentenceTransformers, LLM Integration
Testing & Tools	Pytest, Unit/Integration Testing (80%+ coverage), Git, Postman, Jira

PROFESSIONAL EXPERIENCE

Software Engineer – Backend — **Biddano Pvt. Ltd.** | Pune, India *Aug 2024 – Present*

- Owned and developed order management, supplier, and logistics API services within a microservices-based B2B pharma platform using **FastAPI** and **Django REST Framework**, serving enterprise clients across Android, iOS, and web.
- Designed and implemented Redis caching strategy and PostgreSQL indexing across high-volume production endpoints, reducing API response latency by **40%**.
- Architected **Celery + Redis** async task processing pipeline for ERP integrations, scheduled jobs, and reporting workflows, eliminating synchronous bottlenecks in time-critical operations.
- Designed **JWT** and **RBAC**-based authentication systems for role-segmented access; containerized all services with **Docker** and automated deployments via GitHub Actions **CI/CD**.
- Maintained **80%+ Pytest coverage** on critical API services; led production incident debugging and drove ongoing backend performance improvements.

Python Developer — **Shekru Labs India Pvt. Ltd.** | Pune, India *Apr 2023 – Jul 2024*

- Designed and owned backend architecture for multiple production products using **Django REST Framework** and **FastAPI**, serving business clients across restaurant, HR, and construction domains.
- Proposed and implemented PostgreSQL indexing strategies, Redis caching layers, and ORM query refactoring that improved application performance by **30–40%**.
- Built **JWT**-secured REST APIs with **RBAC**, multi-version API support, and integrated third-party payment gateways for secure financial transactions.
- Containerized all services with **Docker**, deployed on **AWS EC2/S3** behind Nginx, and built GitHub Actions **CI/CD** pipelines for fully automated deployments.
- Developed **Celery** background tasks for notifications, invoice processing, and scheduled reports; maintained 75%+ test coverage using **Pytest** across core modules.

KEY PROJECTS

ShortBuk – B2B Commerce & Warehouse Management Platform · Biddano Pvt. Ltd. Python · Django · DRF · PostgreSQL · Redis · Celery · Docker · AWS

- Owned order management, supplier, and logistics microservices within a production B2B pharma platform handling order processing, warehouse operations, inventory sync, and reporting across Android, iOS, and web.
- Designed **Redis + Celery** architecture for ERP synchronization and scheduled workflows; optimized **PostgreSQL** queries significantly cutting dashboard load times for large-scale inventory operations.
- Deployed fully Dockerized microservices on **AWS** with **CI/CD** pipelines; contributed to microservice boundary design decisions for independent scalability.

AI-Powered Product Mapping & Catalog Reconciliation Platform · Biddano Pvt. Ltd. Python · FastAPI · Django · PostgreSQL · Redis · Celery · ChromaDB · AWS ECS

- Designed and built AI-powered catalog reconciliation platform with a **5-stage matching pipeline**: SKU matching → normalization → semantic embeddings → LLM reranking (**Anthropic Claude**) → human review, significantly reducing manual catalog matching effort.
- Developed **RAG** retrieval using SentenceTransformers + **ChromaDB**; Redis pub/sub + Celery for async processing and real-time **WebSocket** progress tracking for large supplier catalog uploads.
- Deployed on **AWS ECS Fargate** with Docker; designed AI confidence scoring, audit logging, and human-in-the-loop validation workflows, substantially reducing manual reviewer workload.

MenuMitra – Restaurant & Hotel Billing Management System · Shekru Labs India Pvt. Ltd. Django REST Framework · FastAPI · PostgreSQL · Redis · Docker · AWS

- Designed and owned full billing backend — invoice generation, order management, and payment workflows — with **RBAC** for admin, cashier, and staff roles; deployed to multiple restaurant and hospitality clients.
- Integrated third-party payment gateway; proposed **PostgreSQL** indexing strategy that reduced billing query times; built **Celery**-based invoice processing and reporting pipelines.

InfraPilot – Construction Site & Resource Management System · Shekru Labs India Pvt. Ltd. FastAPI · PostgreSQL · Redis · Celery · Docker · AWS

- Designed backend APIs for construction site monitoring, worker management, attendance tracking, inventory, and project progress — deployed across multiple construction firm clients.
- Proposed and implemented **Celery** async task architecture for notifications and report generation; applied **PostgreSQL** query tuning and **Redis** caching, improving average response times.

DocIntel – AI-Powered Knowledge Intelligence Platform · Personal Project · github.com/RohanTekale FastAPI · PostgreSQL · FAISS · ChromaDB · OpenAI API

- Built semantic document search platform with scalable PDF/DOCX/Markdown ingestion, **FAISS** vector search, and **RAG** workflows integrating OpenAI API for contextual AI responses over large document corpora.
- Designed secure multi-tenant FastAPI backend with **JWT** authentication, **RBAC**, and workspace isolation; maintained **80%+ Pytest coverage** across all API endpoints.

Credify – Financial Workflow Management System · Personal Project · github.com/RohanTekale Django REST Framework · PostgreSQL · Redis · Celery · Docker

- Designed and built full-featured financial workflow platform covering payment processing, transaction reconciliation, multi-step approval chains, and automated financial reporting.
- Improved transaction throughput using **Redis** caching and **PostgreSQL** query optimization; implemented **Celery** async pipelines and webhook handling for real-time event-driven payment updates.

EDUCATION

B.E. – Electronics & Telecommunication | Savitribai Phule Pune University, Pune **CGPA: 9.02 / 10.0**
2019 – 2023

CERTIFICATIONS

- Python for Data Science, AI & Development – University of Michigan (Coursera)
- Django Application Development – IBM
- Docker & Kubernetes – IBM
